

FACILITIES and PARKS STATUS

June 16, 2014

- The New Police Facility and Municipal Building Project are now complete. Facilities Management will follow up on cosmetic requests (i.e. wall hangings, paint touch up, furniture moves). Overall I believe all departments are satisfied with their new surroundings.
- An assessment was done of the City ponds and water retention areas. We looked at the signage regarding swimming, fishing and hours of operation. New signs have been ordered and will be installed ASAP.
- Work continues on the new mechanical maintenance agreement at the Rec Center. The contract includes preventative maintenance on all pumps, motors and HVAC systems. All scheduling and maintenance records will be inputted into the new FMx system.
- The energy audit project will be full steam ahead in the next few weeks. Areas of concern this month are the Town Hall, Municipal Building and the Rec Center.
- The Parks Department has caught up with the grass. The wet Spring created challenges, but the men pulled through and are now maintaining a regular schedule with grass, flowers and sport fields.
- The Parks Department completed the flower planting at the Municipal Building, it has never looked better.
