

Report to Mayor and Council  
February

Work on the sanitary line to the course is nearing completion. Lines have been bored across the back 9 and the lift station was placed on Wednesday February 10<sup>th</sup>.

A pre-construction meeting for the hillside project is scheduled for Thursday February 18<sup>th</sup>. After that meeting we should receive a copy of Decker Construction's timeline and schedule. I will present that to the golf course contractor to coordinate with his construction schedule.

The contractor for the #9 green project will be awarded to Tom Topp construction. Mr. Topp has done golf course projects at Scioto CC, NCR, and Miami Valley Golf Club. He came highly recommended for his quality of work and professionalism.

League schedules are being finalized now. I'll update the Mayor and Council in March, but as of now I'm expecting all leagues from last year to return and we're looking to add 1 or 2 more.
