Subject: Request for Noise Wall

Good morning. Your recent correspondence and petition for a noise and traffic study was forwarded to Noel Alcala in our Central Office, Environmental Services Division. He has reviewed your request and responded as follows:

Edie:

OES has received the petition for a noise study from the subject community. Based on our review, the community does not qualify for a Type II noise wall because they do not predate the construction of SR317. However, if a project comes along that will add new thru lanes to SR317 adjacent to the community, that will trigger the requirement for a noise study for the community that could potentially trigger a noise wall for the community. Thank you for coordinating the information.

If you have any questions or concerns, please do not hesitate to contact me by phone or email.
