

Report to Mayor and Council  
March 16, 2015

	Rounds February	YTD
2010	0	55
2011	209	209
2012	334	621
2013	133	294
2014	0	16
2015	47	47

We are in the final stages of the sanitary line improvement development. The goal is to be in a position to take it to bid in April.

The lighting detection system internal wiring has been completed. All other components of the system will be installed over the next couple of weeks. This system will automatically detect weather events that pose a danger to the players and employees. Sirens have been installed in three locations on the golf course to ensure 100% coverage and will inform players of a lighting event and will signal an all clear when it's safe to resume play.
