

CITY OF GROVEPORT REPORT TO MAYOR AND COUNCIL

October 12, 2016

Engineering Department – *Steve Farst*

- Capital Projects:

Links at Groveport: Hillside	Work on upper area is proceeding. Paving has been applied; curbing still to be done. Lower area: trees planted; area seeded by Golf Dept. Punchlist items are being assembled.
West Bixby Road Reconstruction	Design is underway. Coordination with utility companies proceeding. Coordinating with land owners for easements. Plans are about 90% complete. Public meeting scheduled for Oct 19.
Hendron Road Reconstruction	Design is underway. Coordinating design with Franklin Co. Engineer. Coordination with utility companies and with affected landowners for easements. Plans are about 60% complete. Public meeting pending; expected first week of November
Well Field Improvements	Bids were received Sept 29 for new natural gas generator install. All bids received were under Engineer's estimate. Preparing conform contracts and preparing notice of award. Coordinating with Columbia Gas for new service and service line install. Well shaft maintenance and well pump/motor renovation being arranged and is to be completed this fall.

- Streets/Street:

2016 Street Program	All paving work significantly complete. Neighborhood street crack sealing occurred week of October 10, in the Elmont Subdivision.
---------------------	---

- Development projects:

Groveport II (Pontius Rd)	[Northpointe Development] Site grading and building construction proceeding
Rohr II - 567 Building along Rohr	[Van Trust Development] Site and building construction continues.

- Studies:

Sewer flow meters installed along Main/Wirt week of Oct 7, as part of study effort to evaluate effectiveness of pump station at Groveport park. Same sewers at Main/Wirt were cleaned and TV'd after labor day.
